How to Use This Report	q

Quality and Value Above all Else

Looking to build a portfolio which will generate income and grow? Then this list of The Five companies is the place to start.

"The Five" represents stocks that are of the highest quality and undervalued. These are stocks that have met all or most of the 9 quantitative rules of Simply Investing (see the 12 Rules on page 11). In the long-term these stocks have the highest potential for capital appreciation and dividend growth.

The Five are ordered from highest Dividend Growth to lowest Dividend Growth. More information on how to use this report is listed on page 7.

The Five - US Stocks

Company Name	Symbol	Dividend Growth	P/E Ratio	Current Dividend Yield	Share Price	Annual Dividend	Consecutive Years of Dividend Increases	Dividends Paid Since	Industry

This Month in Perspective

Today the Dow is at 24,103 which is slightly less than 25,029 from last month. But still higher than 23,452 from February and not far from it's high of 2017. What does all this mean?

Markets are cyclical

All this means is that markets are cyclical. This fluctuation is normal, many believe that the market is still high, and further declines are coming. I'm not going to make any predictions, in fact no one can accurately predict where stock prices will go. Regardless of market conditions the key here is to focus on Real Total Return. Kelly Wright talks about Real Total Return, and I firmly believe this formula holds true:

Real Total Return = Capital Appreciation + Dividend Income + Dividend Growth

Real Total Return is capital appreciation, dividend income and dividend growth. The only securities that allow for Real Total Return are common dividend paying stocks.

Dividend Growth

Dividend growth provides you with higher returns. Your Dividend Yield on Cost goes up every time the dividend goes up. Suppose you purchased PG in 2000 for \$23.38, the dividend at the time was \$0.64. With annual increases here would be your yield on cost over time:

Year	Stock Purchase Price	Dividend	Yield on Cost
2000	\$23.38	0.640	0.640 / 23.38 = 2.74%
2005	\$23.38	1.030	1.030 / 23.38 = 4.41%
2010	\$23.38	1.802	1.802 / 23.38 = 7.71%
2015	\$23.38	2.594	2.594 / 23.38 = 11.10%
2018	\$23.38	2.760	2.760 / 23.38 = 11.80%

There you have it, double digit returns from just holding on to a quality stock and collecting the rising dividends. This my friends, is our investing mantra.

Wishing you financial success, Kanwal Sarai

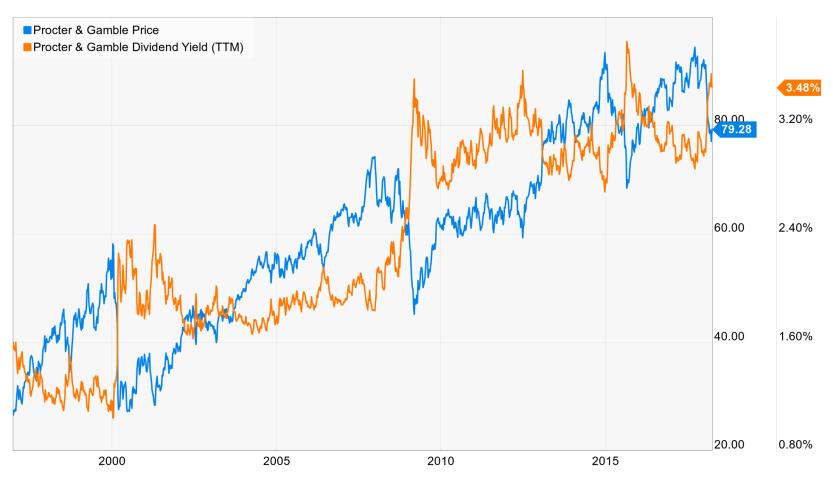

Next Issue: May 1, 2018

Building Your Portfolio

- 1. Start with **The Five** companies listed on the first page each month. These represent stocks that are of the highest quality and undervalued. These are stocks that have met all or most of the 9 quantitative rules of Simply Investing (see the 12 Rules on page 7). In the long-term these stocks have the highest potential for capital appreciation and dividend growth.
- 2. Build a portfolio across the following sectors:
 - a. Basic Materials
 - b. Consumer Goods
 - c. Consumer Services
 - d. Financial
 - e. Health Care
 - f. Industrials
 - g. Oil & Gas
 - h. Technology
 - i. Telecommunications
 - i. Utilities
 - k. Real Estate
 - I. Transportation

Over time certain sectors will be out of favor, this provides a great buying opportunity to acquire quality companies when they are undervalued.

- 3. It does take time to build a portfolio do not rush into buying companies when they are overvalued. Remain patient and disciplined. Do not jump from one investment strategy to the next. Focus on this strategy, avoid the noise in the media, and do not panic when markets decline. Remain patient and continue to collect your dividends thru good times and the bad.
- 4. Use the 12 Rules of Simply Investing as your guiding principles throughout your investing career.
- 5. For those of you looking to learn how to calculate the important stock values for yourself, or expand your investing knowledge, consider taking our online Simply Investing Course.

The Procter & Gamble Company provides branded consumer packaged goods to consumers world-wide. The company's Beauty segment offers hair care products, including conditioners, shampoos, skin and personal care products. The company's Grooming segment provides shave care products under the Braun, Fusion, Gillette, Mach3, and Venus brands. Its Health Care segment offers toothbrushes, toothpastes, and other oral care products; and gastrointestinal, rapid diagnostics, respiratory, and other personal health care products. The company's Fabric & Home Care segment provides fabric enhancers, laundry additives, and laundry detergents; and air care, dish care, P&G professional, and surface care products under the Ariel, Downy, Gain, Tide, Cascade, Dawn, Febreze, Mr. Clean, and Swiffer brands. Its offers Baby, Feminine & Family Care products under the Luvs, Pampers, Always, Tampax, Bounty, and Charmin brands. The company was founded in 1837, has 95000 employees, and is based in Cincinnati, Ohio.

Frequently Asked Questions

1. Why are the stock prices listed in this report different than the prices I checked today?

Stock prices change every day, even every minute, it is impossible to provide real-time prices in a Report format. Subscribers are advised to confirm prices before making any investment decisions.

The types of stocks we follow do not fluctuate too much, but sometimes there can be large variances in prices in a short period of time. The important thing to remember is to confirm that the stock is still undervalued by the time you read this Report, you can easily verify the current dividend yield and compare it to the average dividend yield list in this report. Remember a stock is undervalued when its current dividend yield is higher than it's the average dividend yield.

2. How long does it take a stock to go from undervalued to overvalued?

It can sometimes take anywhere from 5-6 years on average for a stock to move from undervalued to overvalued. However, if you purchased a stock with growing dividends, you'll be earning dividend income while you hold.

3. Should I sell when a stock becomes overvalued?

Here are the following things to consider before you decide to sell a stock:

- is the stock overvalued?
- is it no longer a quality stock?
- is there a better opportunity elsewhere?
- do you need to spend the money on something else?

Selling a stock is based on many factors, including your own personal situation.

Is the stock overvalued?

A stock is overvalued when it's current dividend yield lower than its average dividend yield.

Is it no longer a quality stock?

A stock may not be a quality stock if it has stopped growing its dividend, is no longer profitable, has increased debt, or has payout ratio of over 100%. The SI Criteria column in the Simply Investing Report can be used as a general guideline, any stock with a low grade (out of 9) may indicate a company that is no longer a quality company.

Is there a better opportunity elsewhere?

Perhaps you are only earning 1.5% dividend yield on your stock, but you could be earning 4% in another undervalued quality company, then you may want to consider selling your current stock.

Do you need to spend the money on something else?

Perhaps you need to spend the money on your child's education, a renovation, new home/car, a vacation, or any other reason. At the end of the day you are investing so that you can enjoy the fruits of your labor, if you need the money for something that's important to you then you may consider selling some of your stocks. However, remember the opportunity costs, you will be forgoing any future dividends or capital appreciation for any stocks that you do sell.

4. What is the Graham Price?

The Graham Price was created by Benjamin Graham (Warren Buffett's mentor and teacher at Columbia University). Here is the formula for calculating the Graham Price:

Graham Price = square root of (average of 3 years of EPS x Book Value per share x 22.5)

The Graham Price is a figure that measures a stock's fundamental value by taking into account the company's earnings per share and book value per share. The Graham number is the upper bound of the price range that Graham thought an investor should pay for the stock. But this formula only works when the EPS is positive. In reality you will find that the majority of stocks trade higher than the Graham Price. There is much debate on the use of this formula. In my opinion, all things considered equal choose the stock that is trading close to or below the Graham Price.

5. When is the Simply Investing Report published?

The Report is published on the first of every month.

6. As a subscriber, how do I receive my issue every month?

When you subscribe to the Simply Investing (SI) Report you create your own username and password. Using your username and password you can access the SI subscriber only site and download the latest issue of the SI Report. You will also have access to all previous issues, and the Excel files.

The SI Report is not mailed or emailed to subscribers. You will receive a reminder email each month when the latest issue is posted to the SI subscriber only site.

How to Use This Report

- Start with the cover page, "The Five" represents stocks that are of the
 highest quality and undervalued. These are stocks that have met all or
 most of the 9 quantitative rules of Simply Investing. The stocks are ranked
 from highest dividend growth to lowest dividend growth.
- See the "Undervalued" tables for a list of additional stocks for consideration; remember to apply the 12 Rules of Simply Investing.
- 3. The 12 Rules of Simply Investing are listed on the right.
- 4. The table headings are listed on the next page.
- 5. Watch our video on how to use the Simply Investing Report.

Want to Learn More?

The 12 Rules of Simply Investing

The Rules in **bold** are quantitative, therefore these 9 criteria are listed in the column heading "SI Criteria (out of 9)". A stock that passes all the criteria listed in bold achieves a maximum grade of 9 out of 9.

- 1. Do you understand the product or service offered by the company?
- 2. Will people still be using this product or service in 20 years?
- 3. Does the company have a low-cost durable (lasting) competitive advantage?
- 4. Is the company recession proof?
- 5. Has the company had consistent earnings growth?

Generally, the EPS growth must be at least 8%

6. Has the company had consistent dividend growth?

Generally, the dividend growth must be at least 8%

7. Does the company have a low payout ratio?

Payout ratio must be 75% or less.

8. Does the company have low debt?

Debt must be 70% or less.

9. Does the company have a good credit rating?

Company must have a minimum S&P Credit Rating of "BBB+".

- 10. Does the company actively buy back its shares? (optional)
- 11. Is the stock undervalued?
- a. The P/E Ratio must be 25 or below.
- b. The current dividend yield must be higher than the average dividend yield.
- c. The P/B Ratio should be 3 or less.
- 12. Keep emotion out of investing.

A reminder to keep emotion out of the selection process. Discipline and patience are the keys to successful investing.

Table Headings

Company Name: Name of the corporation

Symbol: Stock ticker symbol

EPS Growth: Average earnings per share growth

Dividend Growth: Average dividend per share growth

Payout Ratio: Payout Ratio is the amount of earnings paid out in dividends to shareholders. Payout Ratio = (Dividends per Share) / (Earnings per Share)

LT Debt/Equity Ratio: Long-term debt which are loans and financial obligations lasting over one year or more. Ratio = (Long-term debt) / (Shareholder's Equity)

S&P Credit Rating: Credit ratings are forward-looking opinions about credit risk. Standard & Poor's credit ratings express the agency's opinion about the ability and willingness of a corporation to meet its financial obligations in full and on time. Ratings range from AAA to D. A rating of "n/a" indicates the company has not requested S&P to rate it.

Consistent Share Buyback: A share buyback occurs when a company repurchases some of its own stock either through purchasing shares on the open market or by buying shares directly from shareholders.

P/E Ratio: The Price-to-Earnings Ratio is a ratio used to compare a stock's market value to its earnings per share. P/E Ratio = (Share Price) / (Earnings per Share)

Current Div Yield: A stock's current dividend yield = (Annual Dividend per share) / (Share Price)

Avg Div Yield: Average dividend yield

Avg Low Div Yield: Average low dividend yield

Avg High Div Yield: Average high dividend yield

High Stock Price: High stock price based on the stock's average low dividend yield, if the current annual dividend is \$0 the high stock price value will appear as 0.

Low Stock Price: Low stock price based on the stock's average high dividend yield, if the current annual dividend is \$0 the low stock price value will appear as 0.

P/B Ratio: The Price-to-Book Ratio is a ratio used to compare a stock's market value to its book value per share. P/B Ratio = (Share Price) / (Book Value per Share)

Book Value Per Share: Book value is the total value of the company's assets if a company were liquidated.

SI Criteria (out of 9): The 9 quantitative criteria taken from the 12 Rules of Simply Investing. A stock that passes all the criteria listed on the previous page achieves a maximum grade of 9 out of 9.

Share Price: The stock share price

Annual Div: The annual dividend

Graham Price: Graham Price = square root of (average of 3 years of EPS x Book Value per share x 22.5) Note: "#NUM!" will be displayed when 3yr EPS average is negative

% Difference Graham Price vs Current Price: The percent difference between the Graham Price and the current stock price. Note: "#NUM!" will be displayed when 3yr EPS average or Book Value is negative

Consecutive Years of Dividend Increases: List the most recent number of years of consecutive dividend increases.

Dividends Paid Since: The first year in which the company started to pay dividends.

Industry: The industry in which the company primarily operates in.

Undervalued/Overvalued: A stock is undervalued when it's current dividend yield is greater than it's average dividend yield, and overvalued when the reverse is true.

EPS: Earnings per share

Consecutive Years of EPS Increases: List the most recent number of years of consecutive EPS increases.
